Electric & Hybrid Multi-purpose Vehicles (MPV) are designed to maximize the interior space for transporting passengers as well as cargo in rear seating rows. MPV's are installed with reconfigurable seats in rear three rows, a higher roof, flat floor and sliding doors for rear passengers. Furthermore, the upright seating positions maximizes the use of interior space to feel more spacious and comfortable. The seating arrangement of MPV has two or three rows, which conveniently could serve 5-8 passengers. Electric & Hybrid MPV's use unibody frame construction and thus are lightweight. Additionally, improved frame construction and reduced weight results in better handling & fuel-efficiency.
