## Abstracts

An electronic humidor cabinet is a humidity-controlled box in your room that is mainly used to store cigars, cigarettes, cannabis, pipes and tobacco. Larger than desktop humidors, they are usually 250 cigars and above. The primary function of humidors is to maintain a constant and desirable level of moisture inside; too much or too little moisture can be harmful to your tobacco products. Secondly, they protect their contents from physical damage and sunlight. Many humidity testers use hygrometers to monitor their humidity, and this is common in cigar shops, which can be up to a foot above the humidity.
