Abstracts

An electrophysiology (EP) laboratory is an operating room or a theatre equipped with high-tech equipment used in the treatment of cardiovascular problems such as arrhythmia, fibrillation, congestive heart failure and stroke among others. EP lab offers patients the opportunity to have their arrhythmia, or irregular heartbeat, tested, diagnosed and treated. An irregular heartbeat can lead to heart complications, fatigue, congestive heart failure or stroke. The EP lab focuses on the electrical function of the heart and treats various conditions on the spot.
