## Abstracts

Electrostatic Oil Cleaner (EOC) is able to remove all of the oil-insoluble particles, whether they are made of metal, non-metal, organic, or inorganic materials. In particular, it removes oil oxidation products, primary culprits for causing malfunction of hydraulic systems. Also it is the only device capable of removing oil oxidation products that are difficult for filters to remove. EOCs are dedicated oil cleaning systems designed for installation on hydraulic and lubricating equipment. Through a kidney-loop process, the EOC draws oil from a main reservoir and circulates it at a low velocity.
