Abstracts

Employee identity theft protection software helps businesses provide their employees with comprehensive identity theft protection. Companies often provide this benefit to their employees as part of their corporate benefits package and can be used as an individual or family plan. This solution provides identity theft protection by monitoring the employee's personal information, including Social Security number, medical information, phone number theft, and so on. Employee identity theft solutions also provide identity monitoring of dark websites, credit reports, and public records. Many employee identity theft protection software solutions offer credit restoration services, lost wallet protection, and identity theft insurance policies. Some employee identity theft protection software solutions provide consultation and investigative services as well.
