Abstracts

Electronics manufacturing services (EMS) is a term used for companies that test, manufacture, distribute, and provide return/repair services for electronic components and assemblies for original equipment manufacturers (OEMs). The concept is also referred to as electronics contract manufacturing (ECM). An original design manufacturer (ODM) is a company that designs and manufactures a product as specified and eventually rebranded by another firm for sale. Such companies allow the firm that owns or licenses the brand to produce products (either as a supplement or solely) without having to engage in the organization or running of a factory.
