Abstracts

ENT surgery workstations, such as the fixed ENT workstation and portable ENT workstation, are commercially available in distinct modalities. A wide range of portable ENT workstations are highly in demand, particularly for ENT clinics due to their easy handling. The standard ENT workstation is made using high-quality, electrolytically galvanised sheet steel and is a mobile ENT unit with a stainless steel base. The upgraded workstation is equipped with an electronic operating and display system along with a user-friendly glass display. With the growing incidence of ear, nasal and throat infections, there is an urgent need to boost the number of ENT clinics and hospitals where ENT treatments can be offered. The major potential end-users of the ENT workstation market, where they are highly in demand and generate significant revenues, include hospitals, ENT clinics and others.

This report contains market size and forecasts of ENT Surgery Workstation in global, including the following market information:
