## Abstracts

Epoxy has a robust structural length and a strong bonding factor that is widely used for filling up voids between the parts. An epoxy contains two parts, the resin that must be blended well and the hardener. The epoxy ceramic adhesives are well-known for their ability to offer strong bonds for interior horizontal and vertical tiling applications.

The epoxy ceramic adhesives are also popular for their excellent resistance to high-temperatures and marginal shrinkage. The epoxy ceramic adhesives are ideally used for porcelain, quarry, slate and granite tiles.
