## Abstracts

Epoxy floor coating systems are made up of two distinct elements: an epoxy resin and a polyamine hardener. These two components are mixed prior to application. Epoxy floor coatings are known for their hardness, durability and impact resistance. These characteristics make epoxy coatings ideal for heavy-duty applications such as industrial facilities, warehouses, logistic centers and other areas that may be subjected to heavy forklift traffic. Epoxy is also known for its resistance to chemical products, such as bleach, oils, greases, cleaners, etc. This chemical resistance makes them a popular choice in garages in the automotive industry.
