## Abstracts

EPTFE stands for expanded polytetrafluoroethylene membranes. EPTFE is a very tensile, dynamic material that's extremely durable. It has a 100 percent fluoropolymer coating that's chemical- and fire-resistant as well as water- and UV-resistant and low-maintenance. EPTFE is great at dispersing daylight, which is why you'll often find it in a number of commercial applications that require light to penetrate the membrane.
