## Abstracts

The terms explosive ordnance disposal (EOD), improvised explosive device disposal (IEDD), public safety bomb disposal (PSBD), and bomb squad are frequently used interchangeably. EOD have existed since the beginning of modern-day military battles. The number one cognizance of EOD is to get used to being unexploded bombs (UXBs) or mines, but has developed into greater anti-terrorist sophistication, becoming less familiar in current warfare. Improvised explosive device (IEDs) can be created with advanced features that can be triggered via infrared (IR) switches or mobile phone alerts. Countries all over the world make significant investment in counter-IED generation.
