## Abstracts

Family law software is a cloud-based solution that helps law firms and professionals manage, review, and track legal documents related to family law cases, such as divorces, adoptions, and marriages. It automates the complete documentation process to save time that can be used for handling critical tasks that require human involvement.

Family law software also helps calculate compensation amounts, such as child support and alimony. Since compensation laws differ depending on the jurisdiction, these calculations can be time-consuming. This type of software automates the process of calculating compensation amounts to free up crucial human hours.
