Abstracts

The growth of the entire packaging industry has led to an increase in the use of plastic resins worldwide, thereby expanding the scope of the slip additive market. In addition, emerging economies (such as India and South Korea) have increasing demand for slip additives. According to the type, the slip additive market is segmented into fatty amides (erucamide, stearamide, oleamide, etc.), waxes and polysilicon. Oxane and so on. In terms of value, the fatty amide market is expected to grow at the highest compound annual growth rate of the global slip additive market. This part of the increase can be attributed to the excellent performance and reduced friction provided by fatty amide-based slip additives. Moreover, these additives are less expensive than wax and silicone-based slip additives.
