A Finger Pulse Oximeter is a Portable, battery-operated pulse oximeter. Finger pulse oximetry is a test measuring the oxygen level (oxygen saturation) of the blood. A pulse oximeter device is non-invasive, clipping on the finger or toe. Two types of LED lights measure the amount of oxygen found in your blood since light absorption in oxygenated and deoxygenated blood in capillaries is different. This measures how efficiently oxygen is being carried throughout the body and oxygenating the tissue.
