## Abstracts

Shortening is a type of oil or fat that remains solid at room temperature. Shortenings are extracted from plant and animal sources and are considered a rich source of fats, vitamins, Omega-3, Omega-6, and minerals. Flaked Shortenings are prepared by melting a shortening composition and applying the melted composition in a churning drum till it solidifies after a certain duration of time. Flaked Shortenings are more brittle and display less smearing when added to the dough used for making food products.
