PBT is semi-crystalline, white or off-white polyester similar in both composition and properties to polyethyleneterephthalate (PET). It is a thermoplastic engineering polymer that is used as an insulator in the electrical, electronics, automobile, mechanical equipment and precision instruments industries. PBT is present in everyday life and is common in electrical, electronic and automotive components. PBT resin and PBT compound are the two types of products that are used in various applications. PBT compound is comprised of various materials that can include PBT resin, fiber glass filling, and additives, whereas the PBT resin only includes the base resin. The material is often used in mineral or glass filled grades. Most PBT resins are used as PBT Compounds. In the report, we only covered PBT compounds.
