Flowcoats plays an important role in composite manufacture. It ACTS as a protective barrier between the laminate and the environment. Flow film is the last layer in non - die applications. It has uv resistance, wear resistance, weather resistance and chemical resistance. Flowcoat is a variation of a gel coat used to coat a molded product (used as a coating) in free air. It adds wax-styrene to the mixture, migrates to the surface, thereby eliminating air and completely solidifies.
