Abstracts

Flowering tea or blooming tea consists of a bundle of dried tea leaves wrapped around one or more dried flowers. These are made by binding tea leaves and flowers together into a bulb, then setting them to dry. When steeped, the bundle expands and unfurls in a process that emulates a blooming flower, and the flowers inside emerge as the centerpiece. Typically they are sourced from the Yunnan province of China. Flowers commonly used in flowering teas include globe amaranth, chrysanthemum, jasmine, lily, hibiscus, and osmanthus.
