Fluorinated lubricants are special grade synthetic lubricants, which possess superior properties as compared to petroleum based lubricants. Most of the petroleum based lubricants fail to perform under -18°C and above 100°C ; the fluorinated lubricants can effectively perform between -90°C and 300°C . Apart from extensive temperature endurance, significant endurance under high load conditions, hydrophobic nature, chemical inertness, oxidation resistant, etc. are some other important properties of fluorinated lubricants. Fluorinated lubricants are available as both oil and grease. This report mainly studies fluorine-based grease market.
