Abstracts

Jetpack Aviation's "The Speeder" (which we first learned about at DesignTAXI) is a sci-fi dream made a reality. It's like Star Wars speeders crossed with a Jet Ski and a helicopter. Featuring four turbojet engines, the 231-pound machine can run on kerosene or diesel fuel. It's also fully stabilized and features a fly-by-wire. And now it's ready to hit the market.
