## Abstracts

Form-stable Bulk Bags are also known as Q bags and are specially used for industrial purposes for storing and transporting dry products such as sand, fertilizers, food items and other. These are made up of flexible fabric such as woven polyethylene and polypropylene. Normally these bags measure around 100-200 cm in height and 114-116 cm in width. Form-stable bulk bags are fitted with the internal structure known as baffles. These baffles help the bag to remain stable after filling ensuring that the bags should remain in the pallet dimensions and guarantees an ideal load for any type of transport. Bulk bags are equipped with one, two or four lifting loops depending upon the sizes of the bags. Work stations and warehouses are fitted with cranes and safety cages to manage heavy bulk bags with a capacity of 1000 kg or more. Form-stable bulk bags are not waterproof and are not designed to carry wet products but, very suitable for applications with powder and coarse products in every segment.

This report contains market size and forecasts of Form-stable Bulk Bags in global, including the following market information:
