Abstracts

A freestanding range is installed in approximately 90% of US kitchens. They are exactly as described: freestanding as in unattached to any walls or cabinetry. This range has the lowest cost and greatest selection of any option and is the easiest to clean under and around as they can be pulled out and away from the wall. Their sides are finished as they are unattached to cabinetry so they can be placed anywhere in the kitchen where this is a gas or electrical hookup.
