Abstracts

Different from the traditional dry bird's nest and ready to eat bird's nest, Fresh Cubilose is the bird's nest product that is stewed and distributed fresh and cold on the same day. The raw materials are all from Malaysian and Indonesian forest marigold in rainy season. The technology of 115 °C, 25 minutes, stewing and sterilization is used to keep the nutritional value and 'fresh' characteristics of bird's nest completely.
