Abstracts

Frozen Meal is a packaged frozen or chilled meal that usually comes as an individual portion. It requires very little preparation and contains all the elements for a single-serving meal. Refrigeration plays a pivotal role in the operational workflow of global supply chain for food products and beverages. Freezing and frozen storage has also gained importance for being a key component in the global value chain of food & beverage products. Over the years, growing accessibility to refrigerated storage units has strengthened the global cold chain and created stable grounds for production and sales of frozen ready meals.
