Abstracts

The Fuel Cell Air Compressor market covers Centrifugal, Roots, etc. The typical players include Rotrex A/S, UQM Technologies, Garrett Motion, Toyota Industries Corporation, etc.

As an important part of the hydrogen fuel cell system supply chain system accessory (BOP), the air compressor is equivalent to the 'lung' of the fuel cell. It pressurizes the air entering the stack to improve the power density and efficiency of the fuel cell. The pressure and flow output of the air compressor can even directly affect the stoichiometric ratio and air humidification characteristics in the fuel cell engine to a large extent, and then affect the voltage output of the fuel cell stack and the power output of the fuel cell engine.
