Abstracts

Full grain leather comes from the top layer of the hide. It includes all the grain with it – hence the name full grain leather. This type of leather retains the inherent toughness, as well as the imperfections because there are no surface alterations or splitting. It is the highest quality leather and the only one suitable for saddleback. Thus, it is also the most expensive. Working with this leather material is challenging. It absorbs body oils and develops a patina over time – a characteristic that attributes to its popularity.
