Abstracts

Functional sugars are a class of carbohydrate with special effects, mainly including functional oligosaccharides, functional dietary fiber and functional sugar alcohols. The cagr is expected to be 4% between 2019 and 2025. The main types of functional sugars are oligosaccharides, soluble dietary fiber, and functional sugar alcohols. In 2018, oligosaccharides accounted for 38 percent of the market, while soluble dietary fiber and functional sugar alcohols accounted for about 37 percent and 25 percent of the market, respectively. China is the largest consumer of functional sugar, with a market share of nearly 24 percent in 2018. Europe is the second largest consumer of functional sugar, with a market share of nearly 23 percent in 2018. Major participants include FrieslandCampina, Baolingbao, QHT, Meiji, and Nihon Shokuhin Kako Co., Ltd., among which FrieslandCampina is the industry leader with a market share of about 5%. The main applications of functional sugars are food and beverages, dietary supplements, pharmaceuticals, etc. Food and beverages are expected to remain the largest application area during the forecast period due to the importance of functional ingredients in improving intestinal health and reducing sugar levels. The market for dietary supplements and pharmaceuticals is also growing rapidly due to increasing concerns about healthcare. The report believes that the functional sugar industry is on the rise and global consumption will show a stable growth curve. With the changes of economic development and international competition, the price of functional sugar fluctuates. In addition, there are fluctuations in gross margins.

This report contains market size and forecasts of Functional Sugar in global, including the following market information:
