## Abstracts

Decor papers are specialty papers used to create quality finishes on wooden materials. Single-color, they are either used as they are or printed with a range of designs. They are used for furniture, furniture fronts, flooring, doors, commercial and domestic interiors, hi-spec surfaces such as kitchen worktops, bathroom surfaces, window sills, exterior applications.

Decor papers are produced mainly using hardwood cellulose, which is of course certified. They are highly absorbent, which makes them very suitable for impregnation. Decor papers can be given fill materials if they are to be used to cover dark backing materials such as particle board and core paper. These white and colored pigments are highly light-resistant and also resilient to chemicals.

Decor papers are made in a wide range of colors and weights. Their surfaces can be satin-finished or machine-smoothed. Other outstanding properties include high porosity, wet strength, light-resistance, and color constancy.
