Abstracts

Grant management software is a program or application that assists fund-seeking organizations such as non-profits and universities in administering and automating the grant process. Functions can include grant discovery, budget planning, peer collaboration, regulatory compliance, proposal submission, administrative reporting and project tracking. Available as self-hosted programs that are installed on the organization's servers, or as web-based cloud applications that are hosted on the provider's servers, grant management software helps grant managers, principal investigators, researchers and other individuals ease grant-related administrative burdens.
