Abstracts

Hall Effect sensors measure the changing voltage within a magnetic field. They are used for proximity sensing, positioning, speed detection and current sensing. They are commonly used in applications such as pneumatic cylinders, printers and computer keyboards. Hall Effect sensors may operate as electronic switches, which are reliable and cost effective, and unaffected by environmental contaminants and therefore can be used under severe conditions. Linear Hall Effect sensors can measure a wide range of magnetic fields and measure either North or South Pole magnetic fields.
