## Abstracts

Global halogen free flame retardant marketis a part of the Global Flame retardant chemicals industry. Flame retardants are a key component in reducing the devastating impact of fires. Flame retardants are generally added to or treat potentially flammable materials such as textiles and plastics. Halogen containing compounds with trioxide are synergistic agents. Thus, the use of halogen containing flame retardants is limited due to corrosive smoke during combustion along with the evolution of toxic gases. Halogen free compounds are considered as prominent flame retardant due to their environmentally friendly properties.
