Abstracts

Hand Shutters are a style of window that originated in China. In ancient Chinese architecture, there were mullion windows, which were used in all dynasties from the Warring States Period to the Han Dynasty. Shutters are a kind of soft decoration for new homes. Newly built buildings are basically used for decoration. Unlike the soft texture of curtains, the shutter blades are made of wood, aluminum alloy and other materials, so they can resist the erosion of sunlight, wind and rain, and are easy to clean.
