Abstracts

The handheld laser welder is a handheld precision laser welder equipment. It can be flexibly used in various field to weld parts with different shapes. The handheld laser welder machine is mainly aimed at long-distance processing and laser welding for large workpieces. It overcomes the limitation of the working distance of the workstation. There are other characteristics, such as small heat effect areas during welding, which would not cause deformation of workpieces, blackening, and traces on the backside, and large welding depth, high firmness, and sufficient melting, all of which can not only achieve heat-conduction welding but also continuous deep-penetration welding, spot welding, butt welding, stitch welding, seal welding, seam welding, etc.
