Abstracts

A hands free door opener is a simple yet effective way to decrease the transmission of germs and bacteria. With the current spread of the coronavirus throughout the world a germ free door opener decreases the need for people to make contact with doors and door handles.

Many people are concerned with catching a virus or being exposed to germs. Door handles are among the most germ-infested objects and research shows contamination of just a single doorknob can help spread germs throughout office building, hotels, schools and more facilities within hours. Cennox offers two products to help risk prevention by using our covered arms or feet instead of our bare hands to open and close doors.
