Abstracts

Connected health also called as technology enabled care (TEC), involves the use of digital media, mobile devices, and health technology. The objective is to maximize healthcare resources and enable care givers, healthcare professionals (HCPs) and patients to easily access data, information and improve the outcomes and overall quality of healthcare as well as social care. Connected health uses technology to provide patient care outside the clinics or hospitals. It includes programs in remote care like home care, lifestyle & disease management and telehealth and often leverages prevailing technologies like connected devices in improving chronic care.
