Heavy duty mixer grinder are multipurpose equipment used in regular activities of food processing and preparation. Heavy duty mixer grinders are generally used for fresh and frozen food to blend uniformly. The contacting parts of mixer grinders are made of stainless steel and aluminum. These are enclosed with vessel that is fixed with a cap at the top of equipment to avoid removal of ingredients while operating by the processors. Moreover, the mixer grinders also have rotating blades at the bottom, used for homogenizing of food ingredients. Emerging products with innovative design, technology, and ability to perform multiple functions in food processing are expected to remain attractive among end-users.
