Abstracts

Hemodynamic/Pressure Monitoring Devices continuous monitoring of the movement of blood and the pressures being exerted in the veins, arteries, and chambers of the heart. Current invasive techniques permit the monitoring of intra-arterial blood pressure, pulmonary artery pressure, left atrial pressure, and central venous pressure. Invasive pressure monitoring requires the insertion of a catheter into an artery (usually the radial, brachial, or femoral artery), vein (the antecubital, jugular, or subclavian vein), or a heart chamber.
