High-speed bearing mainly refers to the bearing whose dn value is greater than or equal to 1.0×10^6 (where d : bearing diameter, n : bearing speed). Because the speed of high-speed bearing is relatively high, in high speed, high temperature, low temperature, strong magnetic field and other harsh conditions, so the lubrication adhesion and working life, working temperature has higher requirements. High speed bearing grease is mainly used in electronics, machine tool manufacturing, textile chemical fiber industry.
