Horizontal Belt Filter is a type of Belt Filter.

The belt filter (sometimes called a belt press filter, or belt filter press) is an industrial machine, used for solid/liquid separation processes, particularly the dewatering of sludges in the chemical industry, mining and water treatment.

Horizontal Belt Filters provide high extraction efficiency, low cake moisture, increased production and reduced operating costs while achieving maximum filtration area in comparison to other filter options. Horizontal belt filters maximize cake purity at minimum specific cost.
