Abstracts

A Hybrid boat is a perfect blend between a bay boat and a center console. If you're looking for a boat that you can have the confidence to take offshore and target pelagics, but also need the versatility to float in less than 16 inches of water, the HB line does both of these exceptionally well.

A hybrid uses an electric motor and a combustion engine to drive a boat across the water, so if you drain the batteries, you can sail quietly knowing you have fuel to get home. A clutch allows propulsion to be transferred between the electric motor and the combustion engine.

The report focus on hybrid boat industry which based on the product application in Sport, Fishing, etc.

This report contains market size and forecasts of Hybrid Boats in global, including the following market information:

Global Hybrid Boats Market Revenue, 2017-2022, 2023-2028, (\$ millions)
