The Independent Hydraulic System Uses A Pre-Charged Accumulator To Deliver Hydraulic Power To Operate The Starter And Start The Engine. After The Engine Is Running, The Pump Driven by The Pto Will Charge The Accumulator. If The Accumulator Is Exhausted And The Engine Needs To Be Started, Many Systems Will Include A Manual Pump To Allow The Operator To Manually Charge The Accumulator To Start. In This Way, The Operator Will Never Be Incapable Of Starting A Diesel Engine Or A Gas Engine.
