Hydrogel is gel-like or colloidal substances made of water and solids. Hydrogels are highly absorbent (they can contain over 90% water) natural or synthetic polymeric networks. It is widely used in medical fields, industrial fields, consumer goods etc.

Hydrogel is widely used in medical industry, such as hydrogel dressing, DDS, implants etc. Hydrogel dressings have the unique ability to provide additional moisture to the wound which both rehydrates necrotic and sloughy tissue to effect debridement and to absorb certain amounts of wound fluid into themselves.
