## Abstracts

imazapyr is an organic heterocyclic herbicide. It can be quickly absorbed by the roots and leaves of weeding in cultivated land. It can inhibit the biosynthesis of side chain amino acids of weeding in cultivated land, prevent weeds from growing and promote their death. The control targets include all weeds, but have no good herbicidal activity against sedge weeds, annual and perennial monocotyledons, broad-leaved weeds and miscellaneous weeds. Suitable for non-arable land and rubber plantation, oil palm, forest and tea plantation.
