Abstracts

In-Mold Label Film are used for In-mold labelling which is the use of paper or plastic labels during the manufacturing of containers by blow molding, injection molding, or thermoforming processes. They are most OPP films. The label serves as the integral part of the final product, which is then delivered as pre-decorated item. Combining the decoration process with the moulding process cuts the total cost, but can increase the manufacturing time. The technology was first developed by Owens-Illinois in cooperation with Procter & Gamble to supply pre-labelled bottles that could be filled on the product filling line. This was first applied to Head & Shoulders shampoo bottles
