A gun safe is a safe for one or more firearms and/or ammunition for guns. Gun safes are primarily used to prevent access to unauthorized or unqualified persons, for burglary protection, and, in more capable safes, to protect the contents from damage during a flood, fire, or natural disaster. Gun safes have largely replaced the gun cabinets made of fine stained wood with etched glass fronts used for display that were commonly used decades ago, although some gun safes are made to resemble such gun cabinets.

The report studies vehicle gun safes which can be installed in vehicle seat console, fold down armrest, vehicle trunk and other places.
