## Abstracts

The first rollout of 5G networks are NSA deployments that focus on enhanced mobile broadband to provide higher data-bandwidth and reliable connectivity. They are in line with the 3GPP specification that early rollouts of 5G networks and devices be brought under NSA operation – meaning, 5G networks will be aided by existing 4G infrastructure. So service providers who want to be first to offer 5G speeds will start with NSA and, once 5G coverage is established, implement standalone 5G.
