Abstracts

We defines this market as vendors that supply hardware and software components to provide indoor location to a breadth of organizations that include enterprises as well as the owners of public venues. It is important to note the many different technology options for providing location information. Client interactions show that they use differing algorithms, techniques, frequencies and architectures to achieve a single aim: to provide the location of an asset or person within one meter, which may also be typically defined is less than one arm's length. The ability of vendor solutions to provide this granularity of location has varied greatly. Some vendors can provide location accuracy to less than a couple of centimeters, while other implementations will provide accuracy to a radius of 10 meters.
