Abstracts

The combustible gas alarm is also called a gas leak detection and alarm instrument. When the flammable gas leaks in the industrial environment and daily life environment (such as kitchens that use natural gas) and the flammable gas alarm detects that the flammable gas concentration reaches the alarm value set by the alarm, the flammable gas alarm will emit sound and light Alarm signal to remind to take safety measures such as evacuation, forced ventilation, and shutdown of equipment. In addition, the gas alarm can be linked to related linked equipment such as leakage in factory production, storage and transportation, and can drive exhaust, cut off power, spray and other systems to prevent explosions, fires, and poisoning accidents, thereby ensuring safe production.
