Abstracts

The industrial hydraulic environment enjoys liberties not available to the mobile machinery camp. The most obvious of which are space and budget. Although not necessarily unlimited, hydraulic power units are bespoke designs naturally requiring individual attention for each build, so we understand the cost is often high. The same, too, with available real estate; both the power unit and actuators often have no dimensional limitations with floor or installation space. Mass, of course, is entirely irrelevant on industrial hydraulic machinery, as is evident if you've ever seen an automotive stamping press.
