Abstracts

Industrial ventilation equipment is the mechanical system that brings in 'fresh' outdoor air and removes the 'contaminated' indoor air. In a workplace, ventilation is used to control exposure to airborne contaminants. It is commonly used to remove contaminants such as fumes, dusts, and vapours, in order to provide a healthy and safe working environment. Ventilation can be accomplished by natural means (e.g., opening a window) or mechanical means (e.g., fans or blowers). This report only covers fans or blowers.
